TURN OFF WAIKATO RIVER WATER AS A 'RAW' SOURCE OF DRINKING WATER! "BEST 'RAW' WATER FIRST!"

We, the undersigned, call on the Auckland City Council to tell Metrowater not to sign the Watercare Services Ltd bulk water contract unless there is a clause contained to refuse Waikato river water supply as a 'raw' source of drinking water, in whole or in part, in order to minimise the future risk to public health.

We call on the Auckland City Council to instruct the Auckland City Council's representatives on the Watercare Shareholders Representative Group to direct Watercare Services Ltd to minimise the public health risk by not using Waikato River water as a 'raw' source of drinking water. Where's the drought?

We the undersigned give notice to the Auckland City Council that we do not want to drink Waikato river water and will consider refusing to pay our water bills as you are forcing it through our taps when it is neither wanted or needed, and we have had no say on whether or not we ever wanted to drink it on a daily basis.

We the undersigned will consider being parties to a class action to sue the Auckland City Council for breach of statutory duty under the Health Act 1956 if Waikato water is not 'turned off' and the possible future risk to public health minimised by using the best quality 'raw' water available.
